

MARLAINE VERHELST

Let's do a frog

I love frogs. Their shape is very interesting, they can have all kinds of colours AND they could change into a prince.

I made the frog as a wall decoration but please feel free to change the pose or to make a combination with a doll. In the class you will get some examples. .

The total length of the frog I made, is 14 inches (35 cm.).

The class includes:

- Cutting the body into Styrofoam
- Construction of legs and frog's eyes
- Working with papier maché
- The painting process with acrylics

When I made this frog I was made in the mood for bright colors. But don't worry. You can make yours in any color you like. It seems that –like mushrooms- the more colourful they are the more poisonous.

A material kit is available and highly recommended.

Kit fee for 3 - 6 weeks delivery:

- \$ 69 (without tracking #)
- \$ 79 (with tracking #)

The content of the kit is:

- a one kilogram package of papier maché powder
- a styrofoam base for the body , 4 inches (10 cm.) thick
- electric wire for the legs
- 18 cork balls for the fingers
- a styrofoam ball for the eye balls
- two glass marbles for the eyes
- lace for cutting out the 'pimples'
- pattern sheets
