

MARLAINE VERHELST

Your Own Horse

This horse is sculpted with a kind of papier maché around a base of styrofoam. The size of the completed body of the horse is appr.9 inches long and 9 inches high. You can easily adjust the size if you want. You will be guided step by step to shape the body of the horse, to make the body parts and to paint the horse with acrylics

The horse can be used as an object on its own or in combination with a doll. This jumping horse is placed on a stand but you will get suggestions for alternatives as well. Marlane Verhelst will be happy to answer all your questions

A material kit is available and highly recommended.

Kit fee for 3 - 6 weeks delivery:

- \$ 69 (without tracking #)
- \$ 79 (with tracking #)

The kit includes:

- the pre-cut styrofoam horse shape
- one kilogramme package of 'Omyacolor' papier maché, a sawdust material
- fringe for the tail and the mane
- electric wire for the legs
- thin wire for the ears
- 2 glass marbles for the eyes
- a plastic tube for the stand construction
- aluminium bar for the stand
- some extra styrofoam to change the position of the neck
